

PMP/PPh	*z	*d		*j	*r
PCLuz	*d ₁	*d ₁	*d ₂ -r-d ₂	*-r-d ₂	*r
Kapampangan	d-r-	d-r-d	d-l-d	-l-d	l-l-l
Proto Sambalic	*d	*d	*r	*r	*r
Bolinao	d	d	r	r	r
Botolan	d-r-	d-r-d	l	l	l

Himes (2012) [demonstrates] that CLuz definitely distinguished *d, *z, and *j:

The split of PMP *d still needs to be explained, but it is obvious that *z never splits. I prepared this overview for a discussion with David Mead, Billy MacConvell and Michael Martens. David Mead has shown the same in a similar way for Proto-Minahasan. So if PPh existed, and PCLuz and PMin descended from it, we must posit PPh *z.
