TAG Also [*mundo*], from Spanish *mundo*.

AKL Root: *libut* ‘surround’.

PAL ‘world, country’.

KAG (*libut + ka- -an*) ‘surroundings’.

SAB	Also [ <i>Juñā</i> ].
ACE	Arabic.
BAT	From Sanskrit.
JAV	Also [ <i>ĵagat</i> ], from Sanskrit.
BAL	Sanskrit, see Gonda 1973.
MAG	From Makassarese.
SIK	The Sara Tana 'Ai expression for 'world' is a phrase of two words, <i>nia-n tana</i> , in ordinary language and a phrase of four words, <i>nia-n tana ləro βula-n</i> , in ritual language. <i>nia-n tana ləro βula-n</i> 'land, earth, sun, moon', is also the name of the deity of the Ata Tana 'Ai (see entry 22.120).
RTI	In ritual language, the earth is referred to as: <i>dae bafa-k ma batu poin</i> .
BUR	Also [ <i>dunia</i> ] and [ <i>duyaŋ</i> ].
DOB	<i>sar</i> is also the word for 'Aru Islands', in contrast to <i>law</i> , 'everywhere outside of Aru', so sometimes the phrase <i>sar ?ay?uy</i> 'whole world' is used to distinguish 'world' from 'Aru'.
NYI	'all lands'.
TAK	'ground, land'.
KAU	In a geographical sense.
TOL	'all, every', used only of places, distributional plural; a CONN, <i>gunā-gunan</i> 'villages, countries', distributional plural.
KIL	<i>βalu</i> 'place, <i>kom</i> <sup>w</sup> <i>aido-</i> 'all', <i>-na</i> 'it'. Variant <i>βalu watanawa</i> 'place below'.
TAW	'all the earth, land'.
MOT	<i>tano</i> 'earth, land'; <i>bada</i> 'big'. See also 01.260 'mainland'.
MEK	'(the) great land', see 01.210 and 01.260.
KWO	'place here of earth'.
PAA	'lower place'. Used in contrast with <i>aut nesa-</i> 'upper place', referring to the Christian concept of heaven.
POR	'the-earth all'.
KWA	'lands' ('land-land'-plural marker), may be a neologism derived from 19th century Bible translation.
TON	Also <i>maama</i> .
SAM	<i>lalo</i> 'space below something', <i>laŋi</i> 'sky', also <i>atulaulau</i> 'all countries, whole world'.
MEL	From Efate.

ATA Also ʔutik. The Mayrinax dialect of Atayal distinguishes between male and female forms for some lexical items. When male and female forms exist for a lexical item, they are both listed in that order and separated by a slash. Generally speaking the female forms are the older forms, whereas the male forms are the innovative ones adopted by many other dialects of Atayal (see Li 1982).

AKL Proto-Southern Philippines \*lugta?

- PAL From Arabic *dunyā* ‘world’.
- MUR *dagana?* ‘earth’ as opposed to sky; *tana?* ‘land’ as opposed to water.
- BAT Proto-Batak *\*tanəh*.
- JAV Also [*buɔnɔ*], Sanskrit.
- BAL From Sanskrit, see Gonda 1973 ‘country, state, world’; also *ləmah* ‘physical world’ (as opposed to spirit world). *pə-ləmah-an* area of land owned or controlled, e.g. of a house, village. Old Balinese *ləmar*.
- UMA Land, as opposed to water.
- DOB Often used in contrast to *law* ‘sea’.
- TAK ‘ground, land’.
- YAB Also *gameŋ* ‘place, area, locality’.
- KAU Also *mulus-ŋin* denotes a limited topographical area; used with *pi* to denote a level area of ground (see 01.230).
- MOT See also 01.212, 19.110. Bible has *yahu* (Western Motu?).
- MEK *əŋo* is ‘solid land’ as opposed to the water that so frequently inundates it. By extension, it is also the rain-forest that covers the land, or even ‘timber’ when this is viewed as a resource.
- LAU Also *tolo*.
- LEW Extended use of *tano* ‘down’; see 12.030.
- NEN Also *gide, rawa(n)*.
- KIR *te aonaba*; *aon* ‘surface of’, *te anna* Northern dialect; elsewhere, a bound form in items like *rianna* ‘go overland’, *nako anna* ‘go ashore’.
- MSH Also ‘down’.
- WLE ‘under the sky’.
- SAM *lau-* prefix classifying a noun as referring to a flat or thin object, *?ele?ele* ‘earth, soil’ (01.212); also *fanua* ‘cultivated land’, *lau-fanua* ‘area of cultivated land, field(s)’.

TAG From Malay *tahun* 'year'.

AKL Also [*panahun*] from Malay *tahun* 'year'.

PAL Also [*timpu*].

ACE A modern borrowing; likewise [*cuwaca*] 'brightness' from Sanskrit, is also used for 'weather' under the recent influence of Malay.

MIN	From Sanskrit, see 01.710.
ʒUN	Also [ <i>hawa</i> ].
KON	<i>kodi hattu-a</i> ‘bad weather’; <i>haʒiʔ hattu-a</i> ‘good weather’; <i>hattu-a</i> by itself does not mean ‘weather’.

TSO Young man/woman of about twenty years old, see also *ri-rpiŋ-i* ‘young man/ woman as well as young animals fully grown up (about twenty to twenty-five years in case of human beings)’.

PAI *kaʒunu-an* ‘teenagers’.

- KAL (*maN-R<sup>1</sup>-balu*).
- TAG Also *binatilyo*; Proto-Southern Philippines *\*bāta?*
- AKL *ʔaskit* slang term; also [*soltēro*], Spanish *soltero*.
- KAG From Spanish *soltero*.
- MUR Also *buayoy*, (*sum*)*biliŋ* see 01.210.
- MGY *tuvu* ‘growing; unmarried’.
- IND Also [*rəmaja*] Sanskrit.
- SUN Also *bujaŋ*.
- MAD From (RED-*ɲudəd-an*). Not in Safioedin (1977), Penninga and Hendriks (1913).
- BAL From Sanskrit. In North Bali only, *anak bajaŋ* is used to refer to an adolescent of either sex, see 02.261.
- GOR *bohu* ‘new’, *lo* ‘LINKER’.
- SIK Also *ʔlamə-ŋnibo-ŋ*.
- BUR Also ‘unmarried male’
- DOB ‘male child, unmarried young men’.

- KAU ‘male (person) adolescent’.
- TOL Also *tavuə-nə-bul*, ‘grown up boy, about 15 years old’.
- ADZ ‘man new’.
- KIL ‘male-sexually active’. Note that the gloss ‘sexually active’ is given for two different morphemes, and in this case the classifier does not transfer, so that *\*na-ulatila* and *\*to-pugopugula* do not occur. However each may function as a vb stem; in the simple (ie not reduplicated) form, it does not have a highly sexual connotation; thus, *Yeigu a-ulatila... Yeigu a-pugula...* ‘when I was a young (man) (woman)’. But the reduplicated form of the verb stem morpheme may be used to give clear indication of sexual activity as in *Ka, ma-tau-we-na i-ulu-ulatila!* ‘See that man emph that he continuous sexually active’, ‘Hey, he’s having an active time with the girls’.
- MOT Pl *uhau*. Note *tau* ‘man’.
- MEK The base *ʔoae* is partially reduplicated -- compare *ʔoa-ʔoae* ‘widower’, 02.770 (for which Motu has both *dogae* and *goae*). North Mekeo is regular: *ko-koae*. West Mekeo and NW Mekeo *koae-kogo*.
- RAG Puberty to marriage.
- PAA Young men remain as ‘boys’ essentially until they marry.

NTA Also *suakaku* 'any unmarried male of any age'.

NEN Also *waraŋi*.

KIR Also *terorobuaka*.

TON From Lau Fijian *ḍaravou*.

ATA The kinship terms for the older generations generally distinguish between reference and address; the former begins with *y-* while the latter begins with *ʔ-*.

Reference: Address:

<i>yaβaʔ</i>	<i>ʔaβaʔ</i>	‘father’
<i>yayaʔ</i>	<i>ʔayaʔ</i>	‘mother’
<i>yutaš</i>	<i>ʔutaš</i>	‘grandfather’
<i>yakiʔ</i>	<i>ʔakiʔ</i>	‘grandmother’

RUK There are two sets of kinship terms, reference and address.

Reference	Address
<i>t-ama</i> ‘father’	<i>ama</i> ‘dad’
<i>t-ina</i> ‘mother’	<i>ina</i> ‘mum’
<i>t-omo</i> ‘grandfather’	<i>omo</i> ‘grandpa’
<i>taka-taka</i> ‘elder sibling’	<i>kaka</i>
<i>agi-agi</i> ‘younger sibling’	<i>agi-li</i>

AKL Also *tātay*.

KAG Also *tatay*.

MUR Pet forms *amay*, *apaʔ*, *maman*, *magamaʔ* (x2), *sangaŋamaʔ* (x3).

A. Kinship terms are of two types: 1) common nouns (cn), never used as term of address or as substitute for given name (e.g. *anak* ‘child’ in ‘they have only one child’); 2) personal nouns (pn) which

may accompany or replace given name and may be used as term of address or (with marker *i*) as term of reference (e.g. *gaman* ‘child’ in ‘where are you, Child (*angam*)?’ or ‘this is *i* child (*angam*)’, in which *Anggam* is a given name; some kinship terms belong to both classes: c/pn. B. Frequently have group forms indicating ‘two people involved in relationship’, marked here by (x2) and (x3) respectively (e.g. *ama*? ‘father’; (x2) *magama*? ‘father and child’; (x3) *sangaŋama*? ‘father(s) and children’).

MGY *ra-* + PWMP \**ayaq* (Blust 1979).

ACE Also *abi, ku, tu, du* and [*abu*] from Arabic *abū*.

MIN Also *apa*? both from PM \**apa*?

IND Also *ayah*.

JAV Also *bɔpɔ*.

BAL Also *nanaŋ*.

GOR Also *ti* [*pāpa*] from Dutch *papa*.

KON Also *puaŋ*.

WOL Also *ifa*; *maumo* ‘daddy’; *ode, uma* (general word).

MAG In Western Manggarai and archaic *ame*.

SIK Also *meʔe*.

BUR *ama* extended to include father’s brothers; also *tama* ‘forefather of a lineage’.

IRA ‘my father’.

NYI ‘his father’ (inalienably possessed) and so also for other kin terms.

TAK *tama-n* ‘father-his’, i.e. ‘his father’ is the referential term. *wai, bai, mamai* are (synonymous) terms of address. Any male blood relative related to the speaker through his/her father and of his/her father’s generation is also his/her *tama-n* and is addressed as *wai, bai, mamai*, as is also the husband of any female blood relative related to the speaker through his/her mother and of his/her mother’s generation. The reciprocal kin term is *nanu-n* ‘offspring, child’ (02.430).

DAM Also *dei* (term of address).

YAB ‘his father’; *tama-m* ‘your father’.

KAU *io-k* ‘my father’; *βi-tama-n* ‘man-father-his’, i.e. ‘his/her father’.

TOL For an exact semantic analysis of Tolai kinship terms see Fingleton 1986: 291-312; for their morphosyntactic construction see Mosel 1984: 40 f. Many kinship terms are reciprocal in that they refer to both sides of a kin relationship. Thus *tubu-* means ‘somebody who is

in the relationship grandparent-grandchild, i.e. grandmother, grandfather, granddaughter, grandson'. *tāma-* is reciprocal in Kleintitschen 1921 (see examples in Mosel 1984:40), but seems to be unidirectional today. It does not only mean 'father', but also 'father's brother, and father's sister's husband'.

- ADZ Bound form, taking poss. suffixes: 1st person -*ʔ* (*gaʔ*), 2nd person -*m* (-*gam*), 3rd person -*n* (-*gan*).
- MOT For address, and sometimes reference, *mama* may also be used. It does not take a possessive suffix.
- MAR *mama* (address); *kmaña* (3sg POSS) (referential).
- PAA 'my father'; address term is *tāta*.
- LEW Also *ata* 'father; address term for father'.
- NTA *tata* is informal alternative.
- KWA Also *remu* term of reference.
- NEM The kinship terms, chiefly for the older generations, generally distinguish between reference and address:

AKL See 02.456, 02.230.

KAG ‘sibling’; can postpose *na mama* to specify male.

MUR *pagakaʔ* (rare); also *magakaʔ* (x2), *saŋkākaʔ* (x3), see 02.350.

MGY *raha-lahi* ‘brother of a man’; *ana-dahi* ‘brother of a woman’.

BAT *akkaŋ* ‘older sibling same sex’; *aŋʔgi* ‘younger sibling same sex’;  
*iboto* ‘cross sibling all ages’.

MIN From *\*(ba)dan s-anak* ‘relative, member of the same matrilineal descent group’.

JAV *dulur* ‘relative of the same generation’ see 02.456.

BAL *ñamə* ‘sibling’.

KON Specifically *russanaʔ buruʔne*; also *kaka buruʔne* ‘older brother’; *ari buruʔne* ‘younger brother’.

SIK *βue* ‘elder brother’ (man speaking.); *βari* ‘younger brother’ (man speaking); *nara* ‘elder brother, younger brother (woman speaking).

RTI This wordlist fails to convey the structure of Rotinese kinship relationships: In brief, the basic terms of the system are as follows:

2 + : *bei* (MM, FM)/*baʔi* (FF, MM)

- 1 + : *ama* (F, FB)/*toʔo* (MB)/*ina* (M, MZ)/ *toʔo* (FZ) *ali ama* (HF, WF), *ali ina* (HM, WM)
- Ego: *kaʔa/fadi* (e/y) between same sex siblings  
*feto/nak* (Z/B) between opposite sex siblings  
*kela*: same generation affine, man-speaking  
*hiʔa*: same generation affine, woman-speaking.
- 1 - : *ana* (BC: also ZC, woman-speaking)/  
*sele-dadi* (ZC, man speaking)  
*mane feuk* (DH)/ *feto feuk* (SW)  
*manefeu touk* (DH)/ *manefeu inak* (SW) are commonly used  
alternative terms that derive from neighbouring dialects
- 2 - : *upu* (CC)
- BUR Female ego; for male ego see 02.444 and 02.445.
- DOB *kʷalisan* means ‘sibling of the same sex’, thus a man’s brother, or a woman’s sister.
- SAW ‘same sex sibling’, i.e. ‘a male’s brother’. Also *remɔ* ‘a female’s brother’.
- NYI ‘his brother’, lit ‘child of his mother’.
- TAK ‘his/her same-sex sibling, parallel cousin’. Any blood relative of the speaker’s sex and generation who is the child of one of his/her *tama-n* ‘fathers’ (02.350) or *tina-n* ‘mothers’ (02.360) (i.e. of a blood relative of one of his parents who is of that parent’s sex and generation) is also his/her *tei-n*, as are also the spouse of any blood-related *tei-n* of the speaker and any blood-related *tei-n* of the speaker’s spouse. The term is by definition reciprocal.
- DAM ‘sibling of same sex’.
- YAB ‘cross-sibling.male’, i.e. ‘brother of woman’; *lo-m* ‘your brother’.
- KAU *βoto-k* ‘my brother (male ego)’. Note also *βi-lut* ‘man-opposite-sex sibling’, i.e. ‘my brother (female ego)’ (see 02.450 note).
- TOL *tura-* is only used with male Egos. It refers to the brother and the mother’s sister’s son. The brother of a female Ego is called *tai-*. *tai-* is also used for the mother’s sister’s son and the father’s brother’s son of a female Ego.
- BUA *āri* ‘sibling of same sex’; *maluy nɔ* ‘brother of a female’.
- ADZ *rai-* ‘same sex sibling’; *nafu-* ‘opposite sex sibling’.
- KIL Opposite sex sibling. The possessive pers pron is infix, as: *lu-gu-ta-* ‘bro-my-ther’ ‘my brother’ *lu-de-ta-ia* ‘bro-our (incl)-ther-dual’ ‘brother of us two’.

TAW	<i>nou-na</i> ‘woman’s sibling of the opposite sex’; <i>walehi-na</i> ‘male’s sibling of same sex’.
MOT	The Motu kinship system does not fit these terms. The terms which cover the same domain are <i>kaka-na</i> ‘older sibling of the same sex’, <i>tadi-na</i> ‘younger sibling of the same sex’ and <i>taihu-na</i> ‘sibling of the opposite sex’. For older and younger siblings of the opposite sex <i>taihu-nabada-na</i> ( <i>bada</i> ‘big’) and <i>taihu-namarayi-na</i> ( <i>marayi</i> ‘small’) are used respectively.
KWO	‘man the two of us are born’.
PAA	Referring to males only.
LEW	More commonly <i>p<sup>w</sup>uru-vī</i> (=08.840), <i>kom-pa-sia</i> (=13.230) and [ <i>prata</i> ] (from English).
NTA	<i>p<sup>w</sup>ia-n</i> of a male; <i>manə-n</i> of a female.
KWA	<i>kaməni</i> ‘brother of a woman’; <i>pumani-</i> ‘brother of a woman’, term of reference; <i>piaw-</i> ‘brother of a man’.
XAR	‘brother/sister/friend’; <i>xətɔ bē-rɛ</i> ‘brother, friend’; <i>çɛ̃ bē-rɛ</i> ‘sister, friend’.
EFI	Of male.
WFI	Opposite sex.
RTU	Female speaking.
TON	<i>tuŋaʔane</i> (of female); <i>tokoua</i> (of male).

- KIL See also 02.470, 02.480, 02.490.
- TAW ‘grandparent or grandchild’.
- MEK The kinship system is of the Hawaiian or generational type. Kin terms apply reciprocally between members of non-adjacent generations. *ufu* can thus mean either grandfather/grandmother or grandchild. Sex distinctions only apply to adjacent generations. Thus within the two parental clans all members of the first ascending generation are classified as ‘fathers’ or ‘mothers’ vis-à-vis Ego. However, all members of the first descending generation will ordinarily be referred to as ‘child’ regardless of sex. Members of the same generation will be either senior or junior same-sex siblings, or cross-sex siblings less rigorously ranked for age. Distant relatives

can be qualified as *lala* or *inaŋua*. The five named ascending generations are: *ama* (and *ina*), *ufu*, *apa*, *ŋoki* and *ʔeʔe*.

MGY 'children of brothers'.

- ACE [sɛədara] sabɔh nɛ? ‘kin of one grandparent’ from Sanskrit.
- MIN ‘mother’s relative’, i.e. ‘cousin from mother’s side’.
- IND Also just [saudara].
- JAV Also na?n-dulur.
- BAL Also mindon ‘second cousin’.
- SAS Also sampu.
- GOR (wutatu + poh- -a); also wala?omohuto.
- UMA po-tuaka-a ‘children of one’s parents’ older siblings’; po-tu?ai-a ‘children of one’s parents’ younger siblings’.
- KON sampo si-kəli ‘first cousin’; sampopin-ruəŋ ‘second cousin’.
- WOL Also witinai ‘family’.
- MAG Also nara.
- SIK The classification of cousins in Sara Tana ’Ai is as follows:  
 Female Ego:                      Male ego:  
 MBS nara                              MBS kera pu  
 MBD βue βari                      MBD βue βari  
 MZS nara                              MZS βue βari  
 MZD βue βari                      MZD ?βine  
 FBS nara                              FBS βue βari  
 FBD βue βari                      FBD ?βine  
 FZS βue βari                      FZS βue βari  
 FZD ura pu                              FZD ?βine  
 For detailed analysis of kinship and affinal alliance in Tana ’Ai, see Lewis (1986).
- BUR There is no generic term for cousin. Someone of the same generation as ego is either kai ‘older sibling same sex’, wai ‘younger sibling same sex’, feta ‘sister (male ego)’, or naha ‘brother (female ego)’ depending on the sex of ego and the birth order of the parents.
- DOB φidi is not inalienably possessed like most relationship terms. The term φidi refers to cross-cousins; parallel cousins are considered one’s brothers and sisters.
- SAW ‘same sex sibling’; also ?remɔ if ‘opposite sex siblings’.

**KAG** *a* focused actor; *ko* non-focused actor; *yaken* preposed focused actor.

**BLA** *agu* focus; *-gu* non-focus; *dəg* emphasis.

**MUR** *aku* emphatic form, pre-verbal or in isolation, post-verbal clitic subject/pivot. *ku* post-verbal clitic, agent, non-subject/pivot (also possessor). *daki*? post-verbal free form, non-agent, non-subject/pivot.

**ACE** Also *ulon*, *uloŋ* originally 'slave'.

**MIN** Also *ambo*, *awa*?

**IND** From Sanskrit. Also *aku* and *ku*.

**SUN** Also *aiŋ*.

**MAD** First person pronoun. Number is not distinguished.

**BAL** Note number is not distinguished in most varieties. First person forms serve equally for the plural pronominal 'we' *aku*, the original

Old Balinese term, is now found only in isolated dialects. [(i)čaŋ], [titaŋ], [tiaŋ] are now the most common forms, all deriving from Old Javanese *tiaŋ* ‘person’: (i)čaŋ has familiar or crude connotations, according to context; *titaŋ* ‘humble’ form; *tiaŋ* polite form, used between equals, strangers. [(i)ragə] from Sanskrit, polite form; *kai* familiar/crude; (a)wake (in some Northern dialects *oke*) lit ‘the body’

SAS Also [tiaŋ] from Balinese.

GOR Also *wātiya* shows respect to interlocutor.

MAG Personal suffix is *-k*; possessive suffix *-g*.

BUR Cliticised to *ya* or *yak*; also *a-* ‘pronominal proclitic subject marker’.

TAK Independent pronoun. Takia has four pronoun paradigms: independent, subject prefixes, object suffixes, and possessive suffixes.

TOL The Tolai pronouns distinguish between singular, (dual), trial and plural, and in the (dual), trial and plural between first person inclusive and first person exclusive. Furthermore, they constitute three paradigms: 1. independent pronouns, 2. subject markers i.e. cross-referencing pronouns which are an obligatory part of the verbal complex, 3. pronominal suffixes which are attached to relational nouns in order to denote the possessor or which are combined with certain prepositions. Furthermore, there is the indefinite subject marker *di*, which is used when the speaker does not know or does not want to express the agent of an action (Mosel 1984: 93).

MEK *Iau* corresponds to North Mekeo *itsi*, West Mekeo *iji* and NW Mekeo *iu* all from a postulated PMek *\*eau*. (Desnoës records archaic North Mekeo *itau*.)

NEM There are several sorts of personal pronouns:

		Subject/Emphatic	Object	Possessive
sg	1	<i>wŋ</i>	<i>ŋ</i>	<i>-ŋ</i>
	2	<i>do</i>	<i>ro</i>	<i>-m</i>
	3	<i>ye</i> (subj)/ <i>yek</i> (emph.)	<i>ek</i>	<i>-n</i>
dl	1 (incl)	<i>nedu</i>	<i>nedu</i>	<i>-du</i>
	1 (excl)	<i>nebu</i>	<i>nebu</i>	<i>-bu</i>
	2	<i>yelu</i>	<i>ru</i>	<i>-lu</i>
	3	<i>yelu</i>	<i>ru</i>	<i>-lu</i>
pl	1 (incl)	<i>nei</i>	<i>nei</i>	<i>-i</i>
	1 (excl)	<i>nemi</i>	<i>nemi</i>	<i>-mi</i>
	2	<i>daa</i>	<i>raa</i>	<i>-we</i>
	3	<i>yele</i>	<i>re</i>	<i>-le</i>

CEM There are several paradigms of personal pronouns (see Introduction).

AJI Also *geña*.

XAR Subject form; for other forms see Introduction.

KIR *ŋŋai* ABS, *i* SM.

MSH *ŋa* independent (absolute) pronoun; *i* subject pronoun.

PON *ŋēi* ABS; *i* SM.

WLE *xāŋü* ABS, *i* SM.

TON Also *ou*, *kau*, *u*, *ku*.

SAM Samoan distinguishes between singular, dual and plural pronouns, which constitute three paradigms: 1. independent pronouns, 2. verbal pronouns, i.e. pronouns which form part of the verb-phrase and precede its nucleus, 3. possessive pronouns which in nominal possessive constructions denote the possessor and precede the possessed noun:

		independent pronouns	preverbal pronouns	possessive pronouns
sg	1	<i>aʔu</i>	<i>ʔou, oʔu</i>	<i>-ʔu</i>
	1 (emotional)	<i>ʔita</i>	<i>ta</i>	<i>-ta</i>
	2	<i>ʔoe</i>	<i>ʔe</i>	<i>-u</i>
	3	<i>ia</i>	<i>ia, na</i>	<i>-na</i>
dl	1 (excl)	<i>māʔua, imāʔuamā</i>	<i>mā, māʔua</i>	
	1 (incl)	<i>tāʔua, ʔitāʔua</i>	<i>tā</i>	<i>tā, tāʔua</i>
	2	<i>ʔoulua</i>	<i>lua, ʔoulualua, ʔoulua</i>	
	3	<i>lāʔua, ʔilāʔua</i>	<i>lā</i>	<i>lā, lāʔua</i>
pl	1 (excl)	<i>mātou, ʔimātoumātou</i>	<i>mātou</i>	
	1 (incl)	<i>tātou, ʔitātou</i>	<i>tātou</i>	<i>tātou</i>
	2	<i>ʔoutou</i>	<i>tou, ʔoutou</i>	<i>tou, ʔoutou</i>
	3	<i>lātou, ʔilātou</i>	<i>lātou</i>	<i>lātou</i>

TAH Also *au*.

SIK See 03.210.

RTI Sheep were introduced to Roti in the late 17th or early 18th century. The term for sheep (lit, 'clothed, covered *bi?i*') is based on a contrast with the goat (simply, *bi?i* or the 'real *bi?i*: *bi?i hi-k*).

TAK Informants believe this is a Gedaged borrowing, but there is no evidence that this is the case; the origin of the word is unknown.

TOL Also [*tap*] from German *Schaf*.

MOT Polynesian borrowing.

NEN Polynesian borrowing (Tahitian).

MUR Also *pait*, *kana*ʔ (as food).

MGY ‘game from the water’.

BAT See Simalungun Batak *donkey* ‘meat’, both from Proto-Batak \**dəŋkey* ‘game’.

BAL Also means ‘meat’.

GOR Non-personal nominaliser + ‘(meat/fish) used to accompany the rice’.

UMA *bau*ʔ ‘fish’, but because this term is also used for ‘meat of all kind’, the word *uru* is coming to be used to refer specifically to ‘fish’.

WOL *nopu* ‘fish with poisonous spines’; also *paepae*, *pana*<sup>n</sup>*da*.

BUR Also *ikan*; since there are no fish found inland (until 1975 when [*ikan mujair*] (Malay) were introduced into Lake Rana), it is possible that *ikan* is a borrowing. However, it follows the normal correspondences. Another word *cdhama-t* ‘the floating thing’ is found with far less frequency.

SUN Also [*sirah*] from Javanese.

JAV Also [*sirah*] from Sanskrit.

- BAL In some varieties: *təras*, *tas*. *təndas* is original Old Balinese term, now restricted to animal referents in most varieties. It has been replaced by [*sirah*] from Old Javanese, [*duur*] lit ‘upper part’ from [Old] Javanese; *ulu* (Old Balinese *hulu*) ‘headwaters of river; higher part’.
- SAS Teeuw: *ulu* widespread; *otak* widespread except north.
- MAG Also *lo<sup>h</sup>kor*, *sa<sup>ʔ</sup>i*, Western Manggarai *loŋor* ‘cow’s head’.
- BUR Also ‘headwaters’.
- DOB ‘head’s skin’. Originally *k<sup>w</sup>ul* was possessed by the person and *ʔala-y* was possessed by the *k<sup>w</sup>ul* ‘head’. This is still the case in some dialects of Dobel, such as in Warjukur, where they say *k<sup>w</sup>ul-gu ʔala-y*: ‘head-my skin-its’. In Kojabi the phrase is treated grammatically as a single possessed lexeme.
- SAW From *bəbokε-o*.
- MAM Also *peŋana*, *paŋana*.
- YAB ‘his/her head’; *moke-m-apa<sup>ʔ</sup>* ‘your head’.
- TOL Absolute form *ula*, in compounds *ul*.
- KWO Also *gou(-na)*.
- PAA ‘my head’.
- KWA Also *nuk<sup>w</sup>ane-*.
- NEN Also *ɖai*.
- MSH *pət* ‘head, east side of house’; *wiliɛc* ‘cemetery, head’.
- PON Also *katokenmei* hon.
- RTU Also *ʔuta*.
- SAM (polite) *ao*.
- TAH Also *ʔōmi<sup>ʔ</sup>i*, *ʔāfi<sup>ʔ</sup>i* ‘head of animal’.

ISN *bālun* 'provisions'.

MOL *okon + go--on*.

KAG From (*ka'an + pag-*).

MUR Also *kanaʔ*, *sansam* 'meat/fish/vegetable as side-dish with rice'.

ACE 'cooked rice': the usual word for a meal. Also *puŋajoh* 'cakes'.

IND Also *paŋan* from Javanese.

SUN From Javanese.

- BAL From Old Javanese. *amah-amah-an* ~ *mama(a)n* ‘animal food’ see note O5.110.
- GOR ‘NOM eat’, thus ‘that which is eaten’; also [*rijiki*] from Arabic *rizq* ‘sustenance’, *tamelo* ‘food (served at a feast)’.
- UMA Also *poŋ-koni*?
- KON *kanraŋ-aŋ* (other than rice); *kanre-kanre-aŋ* ‘things eaten’.

- KAU ‘thing PREP-eat-NOM’ = ‘thing for eating’; also *ken-ŋin* ‘eat-NOM’.
- TOL *n*-NOM, *ian* ‘eat’.
- ADZ ‘thing eat-PART’.
- KIL The word given is general word for the staple food diet (yam and taro). Other things eaten are generally described with a class 1 possessive personal pronoun as a preclitic (sometimes apologetically referred to as *gala kaula mok<sup>w</sup>ita* ‘not true food’). Thus, *kagu yena* ‘my fish’ ie ‘fish for me to eat’; *kala simsim<sup>w</sup>ai* ‘his sweet potato’ ie ‘sweet potato for him to eat’. Also used is a lengthened form of the class 1 possessive shown in last two examples; this is regularly used in isolation, with the accented syllable about twice the length usually accorded. Thus: *baisa kagu* ‘this my food’, ‘here is my food’; *bi-ta-kam-si kadasi* INCOMP- 1pl-eat-pl our food ‘let’s eat our food’.
- TAW ‘vegetables’.
- NEM Only vegetables; also *wie-n* ‘fish, meat’; *kū-n* ‘fruit, salad’.
- CEM See also *wiε-n* ‘portion of food’; *ε-n* ‘portion of root vegetables’; *û-n* ‘portion of salad greens’.

TAK	‘exist’, as in <i>yeb a-d da-ya</i> ‘areca nut POSSESSION-their exist-PRF’, i.e. ‘areca nut exists belonging to them’, ‘they have some areca nut’.
MAB	<i>le-</i> ‘inedible objects which are controlled by the possessor’; <i>ka-<sup>1</sup></i> ‘edible objects which are controlled by the possessor’; <i>ka-<sup>2</sup></i> ‘any object which is not controlled by the possessor’.
TOL	Only modern Tolai (Mosel 1984:163f, 167), <i>vatur</i> ‘hold (vb trans)’, <i>və CAUS</i> , <i>tur</i> ‘stand (vb intrans)’, <i>vəke</i> ‘retain (vb trans)’.
ADZ	‘have, own, possess’ are expressed by possessive markers on the noun possessed, for alienable possession. The concept of ‘one’s own’ thing is expressed by an emphatic/reflexive pronoun with possessive markers for alienable possession.
TAW	Marked by possessive morpheme.
MOT	The construction is <i>mai</i> + possessive pronoun + possessed noun or, in the case of inalienable possession, <i>mai</i> + possessed noun +

possessive suffix; e.g. *ia na mai ena ira* 'he has an axe', *ia na mai aonega-na* 'he has wisdom/is wise'; *abi-a* 'get, acquire' (11.160).

MEK ?*e* is always inflected for person and means something like 'proximity; with oblique case marking and an existential verb it functions to express the concept of impermanent physical possession: ?*e-u-ai moni e-ka-e-ŋa* ('proximity-1sg-OBL money 3sg-lie-CONT-EMPH') 'I have money'; ?*e-mu-ai moni laai* ('proximity-2sg-OBL money NEG') 'you have no money'.

RAG Also 'hold, grasp'.

LEW Also *la*, more usually expressed with possessive pronouns.

NTA Possessive pronoun used to give this meaning.

KWA Also *-awahi*.

NEM No verb 'have'; ownership expressed by: 'there is + noun + possessive'.

CEM Translated by 'there is + nom + possessor'. Example *p<sup>wô</sup> nài-lu* 'there are children to they two', 'they two have children'.

XAR 'there is, there exists'.

NEN 'there is/are'

KIR Kiribati frequently forms verbs meaning 'have n' from nouns with the transitive suffix, e.g. *um<sup>wana</sup>* 'have/use s.th. as shelter', from *um<sup>wa</sup>* 'house'; *iai* existential predicate 'there is/are'.

MSH 'existential predicate, 'there is/are'

PON 'existential predicate, 'there is/are'. Ponapean has a set of 'having' verbs, like *āniki* 'own', formed from possessive classifiers.

WLE *yōro* 'existential predicate, 'there is/are'; also a set of 'having' verbs, with the suffix *-rĩ* e.g. *yōrĩ*.

SAM There is no verb 'have, possess, own'; 'have, own, possess' is expressed by three types of constructions:

e	a-	na	le	X	he/she has
TA	POSS-3s		ART		(X is his/hers)
e	iai	l-a	-na	X	
TA	exist	ART-POSS-3s		X	(his/her X exists)
e	iate	ia	le	X	
TA	LOC	3s	ART	X	(X is at him/her)

MEL From Efate.

RAP Possession is expressed using the verb *ai* 'exist, be' in constructions meaning 'exist to me', 'there is X of mine'.

ATA 'the location of sunrise'.

TSO 'place where the sun rises'.

YAM 'where the sun rises'.

TAG *sīlaŋ + -an or -anan*.

AKL 'place of sunrise'; root: *subat*.

MOL *loput + -an*.

KAG Also *sinaŋan*.

BAT From Sanskrit; *ha-biççar-an*.

MIN Probably from Malay; also *mato ari tabiʔ* lit '(where) the sun rises'.

SUN From Javanese.

- BAL *kaŋin* ‘towards the east’; (*bə*)*daŋin* ‘lying east of something’; forms from \**aŋin* (compare NB \**aŋin*, ‘wind’) typically ‘east’, but in some areas ‘the direction to one’s right, when facing mountainwards’.
- GOR Also *mato lo dulahu* ‘sun, east’; [*timuru*] from Malay.
- KON *i-lau?* ‘in the direction of the sea’.
- MAG *awo* and following three entries, can function as prepositions, adverbs and adjectives; *pār* ‘east’, (in eastern dialects *būr*) ‘orient’ compare. *pār lesoga* ‘risen sun already’.
- NGA *lau* ‘toward the sea’ often ‘east’; compass points (*ḅala-ola*) use the sea and mountain and the speaker as points of orientation, *Lau-zele* are opposite points on a slightly slant axis: *lau* ‘seaward’ or ‘downstream’, *zele* ‘toward the mountain’ or ‘inland’; *məna-zale* opposite points on a horizontal axis and are equivalent to ‘left’ (*leu*) and ‘right’ (*vana*) when one faces seaward.
- SIK Also [*timu*] from Malay; direction and orientation are indicated by deictic and locative verbs and adverbs which denote direction and movement in relation to the mountain range; directional adverbs include, *reta* ‘up, upward, above, upslope’, *lau* ‘down, downward, below, downslope’, *ripa* ‘to the right, rightward (when facing downslope)’, *ḅali* ‘to the left, leftward (when facing downslope)’, *lala* ‘diagonally across a slope, either upward or downward’, see Lewis (1989: 312-316).
- BUR *ful timo*, *musu-n timo* ‘east monsoon’; also *lea keha-n* ‘rising of the sun, east’.
- IRA From Malay.
- TAK ‘sun place-its’, i.e. ‘the place of the sun’ (01.520, 12.110).
- DAM ‘sun 3sg-up-INF; also *yāt* ‘east’, *ḅā* ‘west’ (both of direction near speaker); *gā i-se-ya* (sun-rise), *gā i-si-le-ya* (sun-set) both of places a fair distance away.
- MAB *zoŋ unu* ‘origin of sun’; *lele ta zoŋ ise* ‘place where the sun rises’; *re unu* ‘origin of south-east wind’.
- YAB ‘sun its-origin’; also *ə? ke-pi-ŋa* ‘sun it-rise-ABL’, [*əsə*]/(-*ŋa*) from German *Ost*.
- KAU ‘place REL sun come go-upwards base-its REL’ (*tin ə men* brackets a relative clause), ‘the place where the sun comes up’.
- TOL ‘Wind from the North-East’, hence ‘North-East’, no word for ‘East’.
- KIL Usually *o-pili-bomatu* ‘at-part-east’, ‘in the east, eastwards’.

TAW	<i>tupo kaluwabu</i> ‘place of east wind’; <i>kabudala anani geleta</i> ‘place where sun rises’.
MOT	These direction terms are in Lister-Turner and Clark (n.d.) and the Bible but appear to be losing out to borrowings from English.
MAR	‘south-easterly direction (along lay of the island)’.
KWO	‘rising of sun’.
RAG	‘path of eye of sun’.
LEW	‘(south)-east (trade) wind’, etc; no terms for points of compass, the four cardinal points are referred to as <i>prapuna vari</i> ‘four corners’; the names of various winds are used as approximations, also [ <i>is</i> ], [ <i>wes</i> ], [ <i>not</i> ], [ <i>saot</i> ] from English.
POR	‘east wind’.
NTA	‘towards coast’.
KWA	‘seawards’.
CEM	‘low down’, also, ‘north of the island (in the direction of the predominant wind)’.
XAR	<i>ax<sup>w</sup>ε</i> ‘upwards, towards the head of the island’, <i>anã</i> ‘downwards, towards the sea’; <i>ak<sup>w</sup>ē</i> ‘parallel to the coast’.
NEN	<i>hada</i> (visible); <i>hazo</i> (not visible).
KIR	Also <i>rake</i> also ‘up’, as in <i>waerake</i> ‘go east’.
MSH	Also <i>rear</i> ; <i>tak</i> ‘up, east’; <i>cetak</i> ‘on the east side’, <i>caɬtak</i> ‘facing east’; <i>wetān</i> CON ‘east of’; <i>likiec</i> ‘east side’.
WLE	Also <i>xōtuwa-maiya</i> ( <i>maiya</i> ‘against the wind’); <i>tax</i> directional ‘up, east’.
RTU	From English <i>east</i> .
MEL	From English, also <i>mat-te-mataŋi</i> .
